Document Version: 2026 Edition — Confidential

1. Executive Summary

African hospitality enterprises deserve a property management platform built for their realities — not adapted from markets that do not share their infrastructure, currency, regulatory, or operational challenges. LodgeCore Hospitality Technology was purpose-built to address precisely that gap.

LodgeCore is a fully integrated, cloud-native hotel operating system that unifies every department of a hospitality business — from front desk and housekeeping to finance, food & beverage, revenue management, and guest engagement — within a single, coherent platform. It is designed to operate reliably in environments where internet connectivity cannot be guaranteed, where FIRS tax compliance is non-negotiable, and where operational accountability across multiple properties must be maintained in real time.

This proposal presents LodgeCore's platform capabilities, commercial editions, and pricing structure. All pricing reflects our current Partner Programme rates, available to qualifying organisations during this period of strategic market expansion.

2. The LodgeCore Advantage

Offline-First Architecture

LodgeCore's offline engine ensures uninterrupted hotel operations during network outages. Check-in, check-out, billing, room assignments, and point-of-sale transactions continue without disruption and synchronise automatically when connectivity is restored. This is not a fallback mode — it is the foundation of the platform.

Unified Data, Unified Truth

Most hotels operate with fragmented systems — a PMS from one vendor, accounting from another, POS from a third. LodgeCore eliminates that fragmentation. Every transaction, guest interaction, inventory movement, and financial record flows through a single data layer, providing management with one version of the truth across every department and property.

Built to Scale

LodgeCore serves independent hotels and large multi-property groups from the same platform. A property that begins on the Essential edition can graduate to Enterprise without migrating data, retraining staff, or changing vendors. Role-based access, multi-property consolidation, and open API integration ensure that LodgeCore grows with the business.

Nigeria-Ready by Design

LodgeCore includes native support for FIRS VAT and levy compliance reporting, multi-currency billing, generator and fuel cost tracking, and naira-denominated financial reporting. These are not optional add-ons — they are core platform capabilities.

3. The 8 Platform Modules

LodgeCore is organised into eight integrated modules. All modules share a common data layer; there is no duplication, no reconciliation overhead, and no inter-system middleware to maintain.

Module 1 — LodgeCore Core

The operational heart of the platform.

The Core module delivers the full property management suite: a configurable room reservation engine, interactive tape chart, individual and group guest folios, multi-currency billing, a compliant night audit engine, and LodgeCore's proprietary offline engine. Every guest-facing and front-desk workflow originates here.

Includes: PMS, Offline Engine, Tape Chart, Guest Folios, Night Audit, Multi-Currency Billing

Module 2 — LodgeCore Operations

Departmental coordination from a single console.

LodgeCore Operations connects the operational departments — restaurant, housekeeping, maintenance, and procurement — to the same platform used by the front desk. Orders placed at the POS post directly to the guest folio. Housekeeping status updates are visible in real time on the tape chart. Maintenance requests are logged, assigned, and tracked to resolution.

Includes: Point of Sale (POS), Kitchen Display System (KDS), Housekeeping Management, Maintenance Tracking, Inventory Management, Procurement & Purchase Orders

Module 3 — LodgeCore Commerce

Direct revenue and distribution.

The Commerce module enables hotels to drive direct bookings through a branded booking engine, apply rules-based pricing and availability policies, and manage room distribution. Channel Manager integration — connecting to OTAs including Booking.com and Expedia — is currently in active development and scheduled for release on the 2026 roadmap.

Includes: Direct Booking Engine, Booking Rules & Rate Management, Channel Manager (*Roadmap — Q4 2026*)

Module 4 — LodgeCore Finance

Institutional-grade hospitality accounting.

LodgeCore Finance replaces the need for a standalone accounting system with a hospitality-native general ledger, city ledger, accounts payable, bank reconciliation, and departmental profit & loss reporting. Financial data flows automatically from every revenue-generating module, eliminating manual journal entries and reconciliation delays.

Includes: City Ledger, General Ledger, Accounts Payable, Bank Reconciliation, Departmental P&L Reporting, FIRS Tax Compliance Reports

Module 5 — LodgeCore Guest

Relationship-driven hospitality at scale.

LodgeCore Guest enables hotels to build and leverage a rich database of guest history and preferences. Automated pre-arrival, in-stay, and post-departure communications are triggered by booking milestones. A tiered loyalty programme rewards repeat guests, and a dedicated guest mobile app delivers a digital check-in, service requests, and direct messaging capability.

Includes: 360° Guest Profiles, Automated Communications, VIP Loyalty Programme, Guest Mobile App

Module 6 — LodgeCore Intelligence

Revenue optimisation powered by AI.

The Intelligence module applies machine learning to historical booking patterns, competitor rates, and market signals to generate dynamic pricing recommendations. An overbooking engine calculates optimal inventory release levels based on predicted no-show and cancellation rates, while demand forecasting tools support strategic planning across seasons.

Includes: AI Revenue Management, Overbooking Engine, Demand Forecasting

Module 7 — LodgeCore Connected

Smart hospitality for the modern guest.

LodgeCore Connected brings together the digital guest touchpoints and sustainability tools of a contemporary hotel operation. Smart lock integration enables keyless room access managed from the PMS. A WhatsApp AI Concierge handles guest queries and service requests automatically. ESG reporting tracks energy and resource consumption, while a digital tipping feature allows guests to reward staff cashlessly.

Includes: Smart Lock Integration, ESG & Sustainability Reporting, WhatsApp AI Concierge, Digital Tipping

Module 8 — LodgeCore Enterprise

Multi-property governance and integration.

LodgeCore Enterprise provides the infrastructure required by hotel groups, management companies, and ownership structures with multiple properties. Consolidated dashboards aggregate performance across all

properties, role-based access control governs what each staff member can view and action, a full audit log records every system event, and an open API enables integration with third-party ERP, payroll, and business intelligence systems.

Includes: Multi-Property Management, Role-Based Access Control (RBAC), Full Audit Logs, Open API

4. LodgeCore Differentiators

The following capabilities are included within the LodgeCore platform and reflect operational realities specific to African hospitality environments. They represent features that generic international PMS vendors do not offer.

Capability	Description
Staff Biometric Attendance	Fingerprint or PIN-based staff clock-in and clock-out with automated, payroll-ready timesheet generation
QR Code Digital Menu	Guests scan a QR code in their room or at the table to browse the full F&B menu on their phone — no app download required
FIRS Tax Compliance Reports	Automated VAT and levy reports formatted precisely for Nigerian Federal Inland Revenue Service submission requirements
Gift Voucher Management	Issue, sell, and redeem hotel gift vouchers at the front desk or through the online booking engine
Generator & Fuel Tracking	Log diesel consumption, fuel purchases, and generator runtime with cost allocation for operational expenditure control
Guest Complaint Resolution	Log, assign, escalate, and close guest complaints with configurable SLA timers and management escalation alerts
Night Security Patrol Log	Security staff digitally log patrol checkpoints in real time, creating a verifiable accountability record for management review
Staff Scheduling	Weekly shift scheduling across all hotel departments with automated conflict detection and coverage gap alerts
Visitor Management System	Log, verify, and track all non-guest visitors entering the hotel premises with a digital register

5. Edition & Pricing — Cloud SaaS

LodgeCore is available in three cloud subscription editions. The Partner Programme rate reflects a subsidised rate available to qualifying organisations during the current period and is subject to a Partner Programme agreement. All prices are in Nigerian Naira (₦) and exclusive of VAT.

Cloud Edition Comparison

Feature	Essential	Professional	Enterprise
Rooms Supported	Up to 30	Up to 100	Unlimited

Feature	Essential	Professional	Enterprise
Users	Up to 10	Up to 30	Unlimited
LodgeCore Core	✓	✓	✓
LodgeCore Operations	Limited	✓	✓
LodgeCore Commerce	✗	✓	✓
LodgeCore Finance	Basic	✓	✓
LodgeCore Guest	✗	✓	✓
LodgeCore Intelligence	✗	✗	✓
LodgeCore Connected	✗	Add-on	✓
LodgeCore Enterprise	✗	✗	✓
Support	Email	Priority Email & Chat	Dedicated Account Manager
SLA	Best Effort	99.5% Uptime	99.9% Uptime
Onboarding	Self-guided	Assisted	White-glove

Cloud SaaS Pricing

Edition	Standard Monthly Rate	Partner Programme Rate	Annual Commitment
Essential	■100,000/month	■50,000/month	■500,000/year
Professional	■200,000/month	■100,000/month	■1,000,000/year
Enterprise	■450,000+/month	■200,000+/month	■2,000,000+/year

Partner Programme Subsidy: The Partner Programme rate represents a 50% subsidy on the standard commercial rate. This rate is offered under a formal Partner Programme agreement. Standard commercial rates apply after the conclusion of the agreement term or upon any material breach of programme terms.

Annual Commitment Benefit: Properties that commit to an annual subscription receive further savings versus the monthly Partner Programme rate, equivalent to two months at no charge.

6. On-Premise Perpetual Licensing

LodgeCore is available as a perpetual on-premise licence for organisations that require full data sovereignty, operate in locations with persistent connectivity constraints, or whose governance frameworks require on-premises software deployment. The licence includes 12 months of software updates and support. Continued updates and support beyond the first year are covered under the Annual Maintenance Contract (AMC).

On-Premise Licence Pricing

Edition	Standard Licence Fee	Partner Programme Fee
On-Premise Essential	■2,500,000	■1,500,000
On-Premise Professional	■5,500,000	■3,500,000
On-Premise Enterprise	Custom (from ■6,000,000)	Contact Sales

Annual Maintenance Contract (AMC)

Basis	Rate
AMC Fee	15% of the applicable licence fee per year

The AMC covers all software version upgrades, security patches, and access to LodgeCore technical support. AMC is mandatory for continued production support and is strongly recommended to ensure compliance with evolving FIRS regulatory reporting requirements.

7. Expansion Add-On Packs

LodgeCore's add-on packs allow properties to expand their platform capabilities beyond the included edition features. Each pack is available as a monthly subscription or a one-time perpetual add-on for on-premise deployments.

Pack	Monthly Subscription	One-Time (On-Premise)	Key Capabilities
Growth Pack	■25,000/month	■250,000	Corporate rate tiers, extended reporting, promotional code engine
Guest Experience Pack	■35,000/month	■350,000	Digital check-in, in-app guest messaging, satisfaction surveys
Intelligence Pack	■45,000/month	■450,000	AI revenue management, demand forecasting, overbooking engine
Enterprise Operations Pack	■60,000/month	■600,000	Multi-property dashboard, advanced RBAC, ERP integration layer, full audit logs

8. Implementation & Professional Services

All LodgeCore deployments include an implementation engagement. The scope and duration of implementation vary by property size, edition, and any required integrations or data migrations. Implementation is a one-time professional services fee; it is not included in the subscription rate.

Service	Fee
Standard Implementation	From ■200,000
Smart Lock Hardware Setup	■50,000 (one-time)
Custom ERP / Third-Party Integration	■100,000 per integration (one-time)

Implementation scope includes:

- System configuration and property setup
- Rate and room type configuration
- Staff account creation and role assignment
- Integrated training sessions for department heads and front desk supervisors
- Go-live support and post-deployment check-in

Custom implementation scopes — including multi-property rollout coordination, data migration from legacy systems, and bespoke integration development — are available and priced on a project basis. Contact the LodgeCore sales team for a detailed scope and quotation.

9. The 30-Day Evaluation Programme

LodgeCore offers a structured 30-day evaluation programme for organisations that wish to validate the platform's fit with their operations before committing to a full commercial agreement.

Item	Detail
Evaluation Fee	■100,000 (fully credited on conversion)
Duration	30 days from go-live
Scope	Full access to the selected edition, live production environment, implementation support included
Conversion Credit	The ■100,000 evaluation fee is credited in full against the first invoice upon signing of a commercial agreement within 30 days of evaluation go-live

The evaluation programme is not a trial with limited features. Participating properties operate on the full LodgeCore platform with live data, real transactions, and full support. At the conclusion of the evaluation period, the organisation makes a fully informed commercial decision.

10. Commercial Terms & Exclusions

Payment Terms

- Cloud SaaS subscriptions are invoiced monthly in advance, or annually in advance for annual commitments.
- On-premise licences are payable 100% prior to deployment.
- Implementation fees are invoiced 50% upon engagement commencement and 50% upon go-live.

- All invoices are payable within 7 business days of issue.

Inclusions

- All pricing includes access to LodgeCore's cloud infrastructure (for SaaS editions), standard software updates, and the stated support tier.
- The first 30 days of a new cloud subscription include complimentary assisted onboarding.

Exclusions

The following items are not included in the subscription or licence fees and will be quoted separately where required:

- Hardware (tablets, receipt printers, kitchen display screens, smart lock hardware, biometric devices)
- Third-party software licences (e.g., SMS gateway credits, WhatsApp Business API fees, OTA channel manager fees pending roadmap release)
- Data migration from legacy systems beyond standard CSV import tooling
- Bespoke feature development or custom module engineering
- Travel and subsistence for on-site implementation engagements outside Lagos (quoted at cost)

Partner Programme Terms

- Partner Programme rates are available under a signed Partner Programme agreement.
- Standard commercial rates apply immediately upon expiry or termination of the agreement.
- Partner Programme rates are non-transferable and may not be sub-licensed or resold.

Pricing Validity

All pricing in this document is valid for 60 days from the date of issue. LodgeCore reserves the right to revise pricing at renewal, with a minimum of 60 days' advance notice to existing subscribers.

11. Next Steps

To proceed, we recommend the following path:

Step	Action	Timeline
1. Commercial Review	Share this proposal with the relevant internal stakeholders and confirm edition alignment	Within 5 business days
2. Technical Discovery	Schedule a 60-minute discovery call with the LodgeCore implementation team to confirm scope, integrations, and go-live timeline	Week 1–2
3. Agreement Execution	Sign the relevant subscription or licence agreement and Partner Programme agreement	Week 2–3
4. Implementation Kick-off	Commence structured onboarding and system configuration	Week 3 onwards

Step	Action	Timeline
5. Go-Live	Full operational deployment with LodgeCore support	Per agreed project plan

Alternatively, organisations that wish to experience LodgeCore in a live environment before committing may enrol in the **30-Day Evaluation Programme** at any point in this process.

12. Contact

To request a demonstration, initiate an evaluation, or execute a commercial agreement, please contact the LodgeCore commercial team through any of the channels below.
